

Thomas Woroniak

Senior Front-End Engineer

Blue Springs, MO 64015 | 816-673-5726 | thomasworoniak@gmail.com | woroniak.dev | linkedin.com/in/thomasworoniak | github.com/tworoniak

PROFESSIONAL SUMMARY

Senior Front-End Engineer with 12+ years of experience architecting and delivering high-performance web applications. Proven track record building scalable, accessible, production-grade UIs in healthcare, fintech, and agency environments. Deep expertise in component architecture, state management (Zustand, React Query), REST/GraphQL API integration, and developer tooling (Vite, ESLint, CI/CD). Experienced collaborator with cross-functional teams and a track record of mentoring junior engineers. Leverages AI-assisted workflows (Claude Code, Cursor, GitHub Copilot) to accelerate development velocity and code quality.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3, PHP

Frameworks & Libraries: React, React Router, TanStack Query (React Query), Redux, Zustand, Jotai, Zod, React Hook Form, Node.js, NestJS

Styling: Tailwind CSS, Sass/SCSS, CSS Modules, Responsive Web Design, Bootstrap

Tooling & Platforms: Vite, Webpack, Babel, Git/GitHub, Docker, ESLint, Prettier, Vercel, Jest, VS Code

Backend & Data: Supabase, Prisma, PostgreSQL, REST APIs, GraphQL, JSON, Azure Functions, AWS

AI-Assisted Dev: Claude Code, Cursor, GitHub Copilot — agentic workflows, code generation, debugging

Best Practices: WCAG accessibility, SEO, performance optimization, component-based architecture, Agile/Scrum, CI/CD, code review

WORK EXPERIENCE

Woroniak.dev - Kansas City, MO

Freelance Senior Front-End Engineer, January 2025 – Present

Design and deliver production-grade, full-stack web applications with a focus on performance, scalability, and developer experience. Own the full product lifecycle—from architecture and data modeling to deployment—leveraging modern React/TypeScript ecosystems and serverless backends.

- Architected and shipped multiple SaaS-style applications using React, TypeScript, and Supabase, implementing authentication, row-level security, and scalable data models for multi-user environments
- Built **DashTrack**, a finance tracking application for gig workers, implementing IRS mileage deduction logic, quarterly tax estimation, and CSV export—streamlining expense tracking and tax preparation workflows
- Developed **Accreditor**, a multi-tenant accreditation management platform with role-based access control and Supabase RLS, enabling secure collaboration across organizations
- Engineered **Horizons**, an AI-powered travel itinerary application integrating external APIs via serverless edge functions; led full migration from a MongoDB/Express stack to Supabase with feature parity and improved maintainability
- Created **Stackboard**, a real-time engineering dashboard leveraging Zustand for global state and Recharts for data visualization, optimizing rendering performance and state management patterns
- Built advanced front-end systems and tooling, including a 100k-row virtualized list renderer using Web Workers, a W3C design token pipeline, and a WCAG-compliant theme builder with automated contrast validation
- Applied modern performance optimization techniques (code splitting, lazy loading, memoization) to improve load times and runtime efficiency across applications
- Leveraged AI-assisted development tools (Claude Code, Cursor, GitHub Copilot) to accelerate prototyping, debugging, and implementation workflows

EVERSANA INTOUCH - Overland Park, KS

Front-End Developer, March 2020 – October 2025

Developed and maintained responsive web applications in React and Angular for healthcare and pharmaceutical clients.

- Architected and delivered React applications integrated with RESTful back-end APIs and AWS cloud services for healthcare and pharma clients
- Partnered with UX/design teams to translate product vision into accessible, WCAG-compliant interfaces using DOM manipulation and component-driven patterns
- Reduced page load times through code splitting, image compression, lazy loading, and clean component architecture
- Conducted code reviews, enforced SEO best practices, and led accessibility audits across multiple product teams
- Participated in Agile ceremonies — sprint planning, stand-ups, retrospectives — as a consistent contributor to team velocity
- Mentored junior developers through code review, pairing sessions, and technical documentation

UMB Bank - Kansas City, MO

Web Developer II, August 2013 – March 2020

Designed and developed responsive enterprise web solutions for a major regional financial institution.

- Built and maintained enterprise web content using IBM/HCL WCM, Portal, and Connections platforms
- Developed and customized SharePoint sites supporting internal collaboration and content management across business units
- Implemented responsive, mobile-first layouts with HTML5, CSS3, JavaScript, and jQuery

Fishnet Security - Kansas City, MO

Motion Graphics Designer, February 2012 – May 2013

- Created motion graphics, 3D animation, video, and audio for internal and online media
- Built interactive digital signage using HTML, CSS, and jQuery

VML - Kansas City, MO

Interactive Web Developer, April 2007 – January 2012

- Developed client-facing websites using HTML, CSS, jQuery, and enterprise CMS platforms (Vignette, RedDot, OpenText)

Martin Automatic, Inc. - Rockford, IL

Multimedia Producer / Web Developer, October 2000 – January 2007

- Managed full website development lifecycle using HTML, CSS, JavaScript, PHP, and MySQL
- Produced multimedia content, including 3D animations, videos, brochures, and trade show graphics

EDUCATION

Music Composition and Philosophy - Chicago, IL

University of Illinois Chicago — Completed 3 years toward degree

Music Theory — *Rock Valley College*, Rockford, IL
